Course Overview

- Duration: 3 Days | Schedule: 8 Hours per Day
- Audience: Medical Doctors, Dermatologists, Aesthetic Physicians, and Advanced Injectors
- Certificates: IAAI Certificate, CME-accredited British Certification, Lab certificate & European college of medical science and care(GMA)
- Location: Istanbul, Turkey.

CADAVER COURSE

Day I : Applied Facial Anatomy, Surface Mapping & Injection Safety

- Morning Session (09:00 13:00)
- Module I: 3D Facial Anatomy for Nonsurgical Aesthetics
 - Introduction to course structure and cadaver lab safety
 - Detailed analysis of skin, fat compartments, ligaments, SMAS, and fascia
 - Correlation of surface landmarks to deep facial layers
 - Vascular and neural mapping for nonsurgical injectables (supraorbital, infraorbital, facial, angular, and transverse facial arteries)
 - Understanding facial aging from bone to skin—how anatomy guides treatment planning

AESTHETIC

CADAVER COURSE

Day I : Applied Facial Anatomy, Surface Mapping & Injection Safety

- Module 2: Safe Injection Principles and Product Selection
 - Principles of depth, angle, and volume control
 - Safe cannula vs. needle techniques for HA, biostimulators, and hybrid injectables
 - Rheology-based filler selection (G', viscosity, cohesivity)
 - Anatomical danger zones and preventive strategies against vascular occlusion
 - Optional demonstration: Ultrasound as a visualization tool before injection

CADAVER COURSE

Day I : Applied Facial Anatomy, Surface Mapping & Injection Safety

- Afternoon Session (14:00 17:00)
- Module 3: Hands-On Cadaver Dissection & Surface Marking
 - Individual surface marking of aesthetic zones (temple, periorbital, midface, jawline, chin, neck)
 - Layer-by-layer dissection to visualize injection depths
 - Correlation of anatomical planes with injection safety levels
 - Live ultrasound correlation: identifying arteries, filler spread, and correct depth

CADAVER COURSE

Day 2: Advanced Injectable Techniques & Ultrasound-Guided Aesthetic Practice

— Morning Session (09:00 13:00)

Module 4: Advanced Facial Injection Techniques

- Full-face assessment and aesthetic harmonization principles
- Multilayered injection techniques for volume restoration and skin quality
- Treatment of high-risk zones (temple, tear trough, nose, lips, chin)
- Use of hybrid skin boosters and biostimulators (HA-PLLA, HA-CaHA, PCL-based formulas)
- Live ultrasound demonstration: filler localization and diffusion pattern evaluation

CADAVER COURSE

Day 2: Advanced Injectable Techniques & Ultrasound-Guided Aesthetic Practice

Module 5: Managing and Preventing Complications

- Recognition of early and late adverse events–
- Ultrasound-guided hyaluronidase technique
- Management of nodules, granulomas, and edema
- Real-life complication imaging and case-based analysis

CADAVER COURSE

Day 2: Advanced Injectable Techniques & Ultrasound-Guided Aesthetic Practice

- Afternoon Session (14:00 17:00)
- Module 6: Personalized Treatment Planning & Live Demonstrations
 - Patient selection and facial analysis for tailored rejuvenation
 - Combining fillers, toxins, and skin boosters strategically
 - Ultrasound-guided practice on cadaver models
 - Hands-on demonstration: mapping and verification of safe injection planes
 - Group discussion and case-based Q&A
 - Closing Session: Review of anatomical landmarks and key safety takeaways
 - Practical education + Hands-On

CADAVER COURSE

Learning Outcomes

Day 1:

- Participants will develop a 3D understanding of facial structure, identify danger zones, and confidently plan safe, anatomy-guided nonsurgical injections.
- Live demonstration

Day 2:

- Participants will refine injection artistry, apply evidence-based filler science, and integrate.
- Ultrasound for safety, precision, and complication management in clinical practice.
- Practical education + Hands-On

Day 3:

- Practical education + Hands-On

ADVANCED

AESTHETIC

CADAVER COURSE

Key Learning Objectives

- Master clinically relevant head and facial anatomy for nonsurgical procedures
- Correlate surface and deep-layer anatomy for safe filler placement
- Understand filler rheology and appropriate product selection
- Apply ultrasound as a real-time safety and educational tool
- Recognize, manage, and prevent aesthetic complications
